RUHANI ZHANGYRU IS FOUNDATION OF FUTURE NATION

Автор корреспонденции: borisenkoeelna69@gmail.com

Keywords: Modernization, consciousness, Ruhani zhangyru, culture, Modern Kazakhstan, conditions, achievements, younger generation

On 12th of April in 2017 year was published an article of the Head of state of Kazakhstan directed to modernization of public consciousness. To keep and increase cultural and cultural values — here a main objective of work on program article of the president is "Bolashaqqa bagdar zhol: Ruhani zhangyru" ("A course in the future: spiritual updating").

The Ruhani zhangyru program is a new approach to the solution of tasks. The prospect is a modernization of public consciousness, involuntarily like pride of our beautiful Republic of Kazakhstan. Edge with immense open spaces and rich natural beauty in which there live strong in spirit people responsible for the Homeland. But most of all bribes that our President in the article lays great hopes on the younger generation to which to build the new future of the country. Head of our Republic in his article mentioned several stages of development. One of this is phased transition of Kazakh on Latin graphics very important and necessary. The project is designed to give a new impulse to development of language and to integrate it into world space, to interest and motivate citizens to master language. The transition to the Latin alphabet is important. It will help you to keep up with the times and successfully integrate into the global space, while preserving your face. Domestic linguists have now defined the criteria that the future Kazakh alphabet should meet on the basis of Latin script. This is a modernized Latin without redundant elements, a fast-written and easily readable alphabet with recognizable words, and so on. One of the main advantages of innovation is that, learning the state language in Latin, it will be easier to learn English, which the world community now speaks and writes.

"100 new textbooks in Kazakh". Its purpose — to provide the Kazakhstan students with an opportunity to be engaged according to the best world textbooks in Kazakh. The sphere of culture and spirituality has always been and remains one of the most important areas of state policy, which forms the moral character of the Kazakh nation and strengthens the spirit of patriotism. During the years of independence, many museums, theaters, libraries were opened in Kazakhstan, feature films and documentaries were shot. President N.A. Nazarbayev said: "If we want to be a nation with our unique place on the global map of the 21st century, then we must implement another project - "Modern Kazakh culture in the global world". It is about the world recognizing us not only from oil resources and major foreign policy initiatives, but also from our cultural achievements." The effectiveness of the formation and implementation of cultural policy in the modern world largely depends on the level of development of the information infrastructure of cultural activities.

The state and the nation – not a static design, but the live developing organism. To live, it is necessary to have ability to intelligent adaptation.

The new global reality came without knock and permission to all – for this reason problems of modernization face today practically all countries.

Time does not stop, so, modernization, as well as history, – the continuing process.

On a new break of eras Kazakhstan has a unique historical chance through updating and the new ideas to construct the better future.

I am sure: Kazakhstan citizens, especially younger generation, understand importance of

the offer of our modernization.

In new reality the internal aspiration to updating is a key principle of our development. To survive, it is necessary to change. The one who will not make it will be brought by heavy sand of history.

Thanks to the policy of the state, a lot of things are reached and to enter to 30th of developed countries of the world, it is necessary to increase greatly spiritual wealth. The president of the country aims us at preservation of historical heritage, awareness of integrity, identity, inviolability of our state which was created and defended by our ancestors. And today from each of us it is required to make a feasible contribution to its further development.

One of the main conditions of modernization President called preservation of culture and own national cultural and genetic code. The national code of the people is formed through the special relation to the home ground, culture, language, customs, traditions of the people. Integration of Kazakhstan into the international community depends on understanding and realization of the simple truth: the world is open for the one who will be able to seize new knowledge through acquisition of the dominating languages. Therefore the head of state initiated the cultural project "Trinity of Languages" which can fully be considered one of long-term strategies of development for the country. Implementation of this project in many respects will cause formation of new generation of the Kazakhstan citizens knowing several languages.

In the conclusion, I feel like to say that time does not stop, which means modernization, like history itself, is an ongoing process. On the new era of epochs, Kazakhstan has a unique historical chance through updating and new ideas to build their own better future. I am sure that the people of Kazakhstan, especially the younger generation, understand the importance of the proposal of our modernization. In the new reality, internal striving for renewal is the key principle of our development. To survive - you need to change. The one who does not do this will be brought in by the hard sand of history.

Түйін: Бұл мақалада қоғам өмірінің барлық салаларын қозғайтын "Рухани жаңғыру" бағдарламасы қаралуда. Батыл және ұзақ мерзімді келешекте қазақстандық қоғам дамуының қазіргі кезеңінде оның идеологиялық тұғырнамасы өзінше деп атауға болады. Жолдаудың стратегиялық міндеті, қоғамның мәдениеті мен рухтандырушылық - бұл болашақ туралы бағдарламалық ойлаумен айналымға түсіру. Сонмен қатар, жолдауда ертеңгі күннің ерекшелігін, адамның минералдық ресурстарды, сәттілік факторы болуы ұлттың бәсекеге қабілетті болуын қарастырған. Тұтастай алғанда, кез келген ұлттың қасиеттері, ХХІ ғасырдың жиынтығымен лайықты болуы қажет. Компьютерлік сауаттылық, шет тілдерін жақсы меңгеру және мәдени ашықтық осы сияқты факторлар болашақ жастардың бірден бір міндеті болып табылады. Рухани жаңғыру бағдарламасы арқылы мәдени және интеллектуалдық қайта жаңа бастау болуына халық пен мемлекеттің болашақ дамыту үшін берік іргетастың мықты боп қалануына күман келтірмейміз.

Аннотация: В данной статье рассматривается программа «Рухани жаңғыру», затрагивающая все сферы жизнедеятельности общества. Ее смело можно назвать своего рода идеологической платформой развития казахстанского общества на современном этапе и в долгосрочной перспективе. Президентское обращение с программным размышлением о будущем казахстанского общества через культуру и духовность – это наша стратегическая задача. Особенность завтрашнего дня в том, что именно конкурентоспособность человека, а не наличие минеральных ресурсов, становится фактором успеха нации. Поэтому любому казахстанцу, как и нации в целом, необходимо обладать набором качеств, достойных ХХІ века. И среди безусловных предпосылок этого выступают такие факторы, как компьютерная грамотность, знание

иностранных языков, культурная открытость. Нет сомнения в том, что этот аспект положит начало новому духовному, культурному и интеллектуальному возрождению народа и заложит основание прочного фундамента для будущего развития нации и государства.
