EDUCATION PROGRAMME

6B01560 - Geography

Registration number	
Code and classification of the field of education	6B01-Pedagogical science
Code and classification of training areas	6B015-Training of teachers in natural science subjects
Group of educational programs	B014 - Geography teacher training
Type of EP	existing
ISCE level	6
NQF level	6
SQF of education level	6
Language of learning	Kazakh, Russian
Typical duration of study	4years
Form of study	full-time, edistance education
The complexity of the EP, not less	240credits
Distinctive features of EP	-
University Partner (JEP)	-
University Partner (TDEP)	-
Social Partner (DE)	-

Shymkent, 2023

Drafters:

Name	Position	Sign
Tasbolat B.	Doctor of Geography, Associate Professor	
Isaev E.B.	Candidate of Biological Sciences, Associate Professor

				Geography Course	Contents: Software and hardware for teaching geography, educational information - the basis of teaching geography, principles of using information technology in teaching geography. Didactic functions of teaching aids, informatization of general geographical knowledge, information resources for teaching geography, application of information technologies in the system of teaching geography. Improvement of educational activity by means of information technologies, mobile classroom, Telecommunication networks and servers, digital photo and video equipment, features of the use of information technologies in teaching geography.													
		BD	EC	Hydrology	The purpose of the discipline: The study of the physical foundations of hydrological phenomena and processes, patterns of formation of surface and groundwater. Contents: Hydrosphere: structure and origin. Chemical and physical properties of natural waters. Methods and means of conducting hydrological studies of natural waters. The water cycle in nature and the water resources of the Earth. Geographic patterns of distribution of water bodies Hydrology of glaciers. Hydrology of underground waters. River hydrology. Hydrology of lakes. Hydrology of reservoirs. Hydrology of swamps. Hydrology of the seas and oceans. Fundamentals of hydrometry..	4							✓				✓	
		BD	EC	Water Resources of Kazakhstan	The purpose of the discipline: The study of water bodies in Kazakhstan and its distribution, hydrological characteristics, spatial and temporal changes in the characteristics of water bodies. Contents: Water resources of Kazakhstan, surface and ground waters, geographical location and distribution. Patterns of hydrological processes and phenomena, study and description of specific water bodies, applied hydrology, methods for calculating and forecasting various hydrological characteristics, hydrometry, methods for measuring and observing natural waters. Ecological state and rational use.								✓				✓	
		PD		Educational and Methodical Pedagogical Practice	Purpose: The purpose of educational and methodical (pedagogical) practice is to master the main activity of the pedagogical activity of a geography teacher and to form future teachers as professional and personal.					✓	✓	✓						

					Contents: Educational and methodological practice is carried out in conditions close (similar) to the main pedagogical activity. Pedagogical practice is a form of professional training of students at a university, based on a well-known theoretical foundation, providing practical knowledge of the principles and patterns of a teacher's professional activity and mastering the methods of its organization. The activities of student interns during practice are characterized by: informative, developing, organizational versatility, research, etc. During practice, students work as teachers of geography and assistants to the class teacher..													
	Theoretical foundations of geographical science	PD	EC	Geology and the basics of Geomorphology	Purpose: Formation of knowledge and skills about the influence of geological processes on the structure and composition of the Earth and the main processes and patterns of relief formation. Contents: Methods for studying the internal structure and composition of the Earth. The main structural elements of the Earth's crust and the patterns of their development. Geological table. Rocks and their types. Exogenous and endogenous processes. Relief-forming processes, morphostructures and morphosculptures. The relief of the earth's surface and modern geomorphological processes.	4							✓	✓				
		PD	EC	Basics of Geotectonics	Purpose: Mastering the knowledge of geotectonic processes and analysis of their origin, patterns of development, research methods, formation of the basic principles of tectonic zoning. Contents: The structure of the tectonosphere and the earth as a whole. Main sources of energy and deep mechanisms of tectonic processes. Tectonic movements and methods of their study. The main structural elements of the lithosphere. Oceans, their structure and origin. The concept of lithospheric plate tectonics. Principles of tectonic zoning and tectonic maps..							✓	✓					
		BD	EC	Physical Geography of Continents and Oceans	Purpose: To form ideas about the geographical position of the continents and oceans, the stages of the formation of natural complexes and physical and geographical features. Contents: Physical and geographical position of the continents. History of discovery and exploration of continents and oceans, common features and characteristics of natural components. Formation of the	6								✓	✓			

					main natural landscapes and regional patterns of nature that determine the characteristics of the continents. Parts of the globe. Eurasia, North America, South America, Africa, Australia and Antarctica An overview of the nature of the oceans. Geographical nomenclature.													
		BD	EC	Geography of the Service Sector	Purpose: Formation of students' theoretical knowledge about the service sector, the territorial features of its development and geographical approaches to its study. Contents: Introduction. Indicators characterizing the development of the service sector. Service infrastructure. Criteria and indicators of the effectiveness of the territorial organization of public services. Methodology for assessing the effectiveness of the territorial organization of public services. World trade in services. Geography of culture and art. Geography of communication services. Geography of tourist services. Geography of domestic and communal services.									✓	✓			
	Geographical Sciences by objects of Study	BD	EC	General Geography	Purpose: to study the structure of the general geographical envelope, patterns of development, components and natural complexes of its structures at various levels. Contents: History of earth science in general. The geographical envelope of its structural and characteristic features. Space differentiation. Influence of general planetary factors on the geographic envelope. Circulation of matter and energy in the geographic envelope. Solid, water and air layer of the Earth. Teaching about the landscape sphere of the earth. Natural zoning.	5								✓	✓			
		BD	EC	Biogeography	The purpose of the discipline: Formation of knowledge about the diversity of flora and fauna, patterns of distribution of species, features of species and speciation. Contents: Two areas of biogeography: the geography of organisms and the general geography of the animal and plant world (microbocenosis, phytocenosis and geography of zoocenosis). biogeographic zones. Know the generalization and analysis of the geographical features of plants and animals; Large kingdoms of flora and fauna on land.									✓	✓			
		BD	EC	Cartography with the basics of Topography	The purpose of the discipline: Formation of cartographic methods of depicting natural objects and phenomena on general geographical and thematic maps, generalization	6										✓	✓	

				and classification of maps and atlases. Contents: Cartography and its constituent disciplines. General information about the geographical map and globe. The shape and size of the earth. Map projections. Map nomenclature. Topographic maps and their use. cartographic generalization. Thematic maps and geographical atlases, their types and features. Use of cards. Cartographic geoinformation systems. Analysis of maps and atlases and their application at school.															
		BD	EC	Cartography and orientation of the area	The purpose of the discipline: the formation of systematized knowledge, skills and abilities in the field of mapping and orientation of the area and determine the location on a topographic map. Contents: Classification of maps by content. Basic properties of a topographic map. Topographic map, terrain plan, diagrams. The content of topographic maps, symbols, features of the display of relief on topographic maps. Location orientation. Methods for measuring distances on the ground and on the map. Ground measurements and their scaling to create a map, area plan or tourist route.											✓	✓		
		BD	EC	Geographic Information Systems	The purpose of the discipline: Acquaintance with the principles, modern methods of building and using geographic information systems in the Earth sciences Contents: Introduction. Goals and objectives of geoinformation mapping. Geoinformation concept. Principles of creating a GIS. Standard GIS functions. Image processing. GIS characteristic. General requirements for GIS. General geographic analysis. Spatio-temporal analysis. Methodological aspects of GIS application. Comparing the advantages and disadvantages of GIS and assessing the level of their use.	4										✓	✓		
		BD	EC	Geographic Modeling	The purpose of the discipline: Formation of the concept of geographical modeling, familiarity with the features and methods of modeling geographical objects, phenomena and processes and its use. Contents: Concepts about modeling in geography. Cartographic modeling; Forecast modeling; Modeling route-notes; Modeling through support schemes; Model layouts; Geolaboratory: online modeling; Analytical modeling; Modeling - situations Extreme Internet; social											✓	✓		

					modeling; Excursion or hike: travel model														
		BD	EC	Introduction to Specialty	Purpose: formation of general ideas about the future profession, directions of historical development, current problems and prospects of geographical sciences. Contents: Stages in the history of the formation and development of geography as a science, basic concepts, sources, methods and techniques of research in geography. The main directions of geography: "Physical geography", "Economic, socio-political geography", "Soil science", "Geography of peoples", etc. Modern topical problems of geographical science.	6									✓		✓		
		BD	EC	Fundamentals of Academic Writing	The purpose of the discipline: Mastering the general rules and methods, skills of professional reading, academic writing and oral presentation, based on the technique of cognition and its individual techniques. Contents: Academic reading and writing skills, language and structure of scientific and professional texts. Taking notes, writing abstracts, abstracts, familiarization with the results of scientific analysis, reading scientific and professional texts. Increasing the vocabulary of students through language returns that are characteristic of the scientific and professional environment used in academic vocabulary. Development of skills for participation in scientific and professional discussions and presentation of professionally oriented projects. Independent work skills		✓												
		BD	EC	Soil Geography	Purpose: formation of ideas about the geographical distribution and formation of the soil cover, classification, chemical properties of the use of land resources in agricultural circulation. Contents: Identification of the factors that control the formation of soil types and their distribution in the soil cover. Ecological functions, composition, properties of soils. Soil classification, patterns of distribution and stages of evolutionary development. Acquaintance with the hierarchical relations of the factors that form the basis of the modern geographical zoning of the soil cover. Monitoring by methods of studying soil geography.	5									✓		✓		
		BD	EC	Recreational Geography	Purpose: mastering the concepts, methodology and methods of research, development and placement of										✓		✓		

				recreational geography. Contents: History of development, subject, object of research, main tasks of recreational geography. Basic concepts of recreational geography, basic laws of science. Methodology, methods and methods of recreational geography research. Recreational needs of the population and methods of their study. Description of recreational zones, cartographic scheme and natural features. Features of the organization of modern recreational and tourist activities, the possibility of effective														
		BD	EC	Meteorology and Climatology	The purpose of the discipline: Mastering the basic knowledge about the atmosphere, as part of the climate system, and the physical and chemical processes occurring in it, which form the weather and climate of our planet. Contents: The composition of atmospheric air and the vertical structure of the atmosphere. Radiation in the atmosphere. Baric field and wind. Thermal regime of the atmosphere. Humidity. Atmospheric and oceanic circulation. Climate and climate-forming factors. Classification of climates. The study of astronomical, geophysical and geographical factors that determine the formation and natural fluctuations of climate throughout the history of the Earth and the role of anthropogenic factors at the present stage.	5								✓		✓		
		BD	EC	Earth's climate	The purpose of the discipline: Formation of a holistic view of climatic processes in various regions of the Earth and their impact on atmospheric circulation, weather and in temperate and high latitudes. Contents: The structure of the atmosphere, earth radiation, heat and water balance. Atmospheric circulation, the process of evaporation and condensation of moisture, precipitation, dangerous meteorological phenomena. Observations and forecasting. Changes in the Earth's climate, global warming and control measures.									✓		✓		

				relief. Climate, climate-forming factors. Inland waters. Soil - vegetation and wildlife. Natural zones of Kazakhstan, patterns of distribution. Physical-geographical zoning. Ecological state, geoecological zoning. The physical and geographical features of individual regions are characterized															
		BD	EC	Environmental problems of Physical Geography	Purpose: Formation of ideas about the theoretical and methodological foundations of the environmental conditions of environmental problems and the structure of physical geography in the system of Earth sciences. Contents: Human activity and the geosphere of the earth. Atmosphere, hydrosphere, lithosphere and biosphere, main sources of pollution, ways of solution and restoration. Regional environmental problems, changes in geosystems and their main characteristics. Regional environmental problems, general situation, radioactive contamination and sustainable development											✓	✓		
		PD	EC	Landscape Science	Purpose: To study the formation of natural and cultural landscapes, their structure, relationships, location and patterns of development. Contents: The history of the formation of landscape science. Regional and local differentiation of landscapes. Landscape components and landscape-forming factors. landscape morphology. Geosystems of the local level. Dynamics and development of the landscape. Functional and dynamic properties of natural landscapes. Landscape geochemistry and geophysics. Classification and systematics of landscapes. Landscape research methods	4							✓			✓			
		PD	EC	Landscapes of Kazakhstan	Purpose: To study the features of the location and structure of natural landscapes and landscape zoning of the territory of Kazakhstan. Contents: The structure of natural-regional complexes. features, dynamics and evolution of natural-territorial complexes, stability of natural and natural-anthropogenic landscapes. Classification and systematics of landscapes of Kazakhstan. Landscapes of flat regions of Kazakhstan, landscapes of mountainous regions. Landscape regions of Kazakhstan. Landscape map of Kazakhstan. Landscapes in the context of environmental change.								✓			✓			
		BD	EC	Local studies	Purpose: Studying the basics of local history, acquiring	5										✓	✓		

				<p>the skills of studying one's own area, expanding and systematizing students' knowledge about their native land, its history and geography.</p> <p>Contents: The history of the formation of local lore science. The main stages in the development of local history in Kazakhstan. Forms of organization of local history activities in Kazakhstan. Educational and educational value of local history. Methods and techniques of local history research. The main sources of local history material. Natural geographic study of the native land.</p>														
		BD	EC	Regional studies	<p>Purpose: Formation of a holistic understanding of the trends, patterns and interrelationships of political and economic processes, globalization and regionalization in the modern world among students.</p> <p>Content: The idea of the region as a complex, integral and socio-economic object of the respective state. Complex regional studies and its functions. Regionalization of international relations. Complex regional studies and its functions. Political geography and geopolitics. Cultural and historical regions of the world. European regionalism. CIS and regional cooperation in the post-Soviet space.</p>									✓	✓			
		PD	EC	Geoecology and nature conservation	<p>Purpose: formation of knowledge on the preservation or restoration of a favorable ecological state of natural and anthropogenic geosystems by studying the background of the environment, spatial ecology.</p> <p>Contents: Subject, goal and objectives, research methods and general structure of geoecology. Geoecology in the system of earth sciences. Theoretical and methodological foundations of geoecology. Human activity and the geosphere of the earth. Geoecological zoning of Kazakhstan. Regional environmental issues</p>	4								✓	✓			
		PD	EC	Environmental problems of the Republic of Kazakhstan	<p>Purpose: formation of knowledge about the environmental and environmental legislation of the Republic of Kazakhstan for solving environmental and environmental issues.</p> <p>Contents: Problems of ecology and environmental protection in Kazakhstan. Problems of climate change in the Republic of Kazakhstan at the present time. Atmospheric pollutants, radiation environment. General</p>									✓	✓			

					patterns and protective measures for forest damage. Measures for the effective protection of types of natural resources. Demographic situation and the concept of sustainable development of Kazakhstan													
		PD		Industrial-Pedagogical Practice I	The purpose of industrial pedagogical practice I is to deepen theoretical knowledge in general scientific, cultural, psychological and pedagogical, methodological and basic and professional disciplines, as well as to clarify knowledge in disciplines during practice, the formation of pedagogical skills and competencies. Contents: Knowledge of all the main actions of the teacher and the class teacher in the system of integrity using the experience of teachers-methodologists; mastering the basics of work of students with parents; mastering the deep psychological and pedagogical methods of the individual in unity through the study and analysis of the educational situation, mastering the methods of analysis and introspection of various forms of educational work	10								✓	✓			✓
	Socio-economic geography and the modern world	PD	EC	Economic and Social Geography of Kazakhstan	Purpose: familiarization with the population, patterns of development and location of the economy of Kazakhstan and its individual economic regions, determining the role and place of Kazakhstan in the modern world. Contents: Economic and geographical position of Kazakhstan, natural conditions and resources, population and labor resources, sectoral composition of the economy and their characteristics, economic relations with the countries of the world, environmental problems of the republic, tourist and recreational resources, transport and logistics, the role of Kazakhstan in world cooperation, geopolitics of Kazakhstan, economic and geographical zoning of Kazakhstan.	4											✓	✓
		PD	EC	Geographical basic of sustainable development of Kazakhstan	Purpose: formation of knowledge and ideas about modern trends in the sustainability of Kazakhstan. Contents: The concept of sustainable development of the world community, adopted as the basis for the development of modern society. The concept of the transition of the Republic of Kazakhstan to sustainable development. Geographical bases of sustainable development. Demographic crisis and sustainable development. Regional aspects of sustainable												✓	✓

					development. The role of the institutional factor in sustainable development. International aspects of sustainable development. Global changes on the globe.													
		PD	EC	Economic, Social and Political Geography of the World	Purpose: To study the principles, features, factors and general conditions for the location of economic sectors in the world and in individual regions and countries. Contents: Object, subject, structure, basic teachings and theories, methods, modern problems of the economic, social and political geography of the world. economic and geographical position, natural conditions and resources, population and labor resources, sectoral composition of the economy and their characteristics, economic relations with countries of the world.	4											✓	✓
		PD	EC	Theoretical problems of Economic and Social Geography	Purpose: to form the role of economic and social geography in the scientific system of geographical sciences, the importance of economic geography in solving urgent regional and global problems. Contents: Object, subject, structure, basic teachings and theories, methods, modern problems of economic and social geography. Collection, reporting and analysis of information by cartographic, quantitative, comparative geographical, theoretical methods in economic and geographical research, methods of applying theoretical knowledge in practice.												✓	✓
		PD	EC	Geography of World Tourism	Purpose: Formation of a holistic view of the world picture of international tourism, its development in individual countries and regions. Contents: Formation and development of world tourism. Economic content and role of tourism in the modern world. Basic concepts of space organization in the geography of tourism, tourist and recreational, sightseeing tourism. The main tourist destinations in the CIS countries, the current state, the role of tourist areas in Kazakhstan, the development of tourism Actual issues of tourism development.	4											✓	✓
		PD	EC	Geography of tourism of Kazakhstan	Purpose: Formation of knowledge about recreational resources, types of tourism, infrastructure, organization and planning and modern trends in the development of tourism in Kazakhstan. Contents: Objects of study of the geography of tourism in Kazakhstan, classification of tourism, development												✓	✓

					directions, history, overview of types of tourism. Formation of types of tourism Infrastructure of tourist and recreational zones with peculiarities Economic significance of aspects of tourism development. Organization and planning of religious, historical, cultural, natural, ecological tourism in Kazakhstan.															
		PD		Industrial-Pedagogical Practice II	The purpose of industrial pedagogical practice is to test a professional position in the conditions of a specific activity: the formation of professional competencies in the field of design, implementation and evaluation of the educational process and the educational environment, as well as the clarification of knowledge in disciplines during practice. In the course of industrial pedagogical practice, students are in the place of a subject teacher, they feel the pedagogical process. Deepening the theoretical knowledge gained by students within the walls of the university. Learn to apply this knowledge in teaching and educational work with students. Mastering the skills of the subject teacher and class teacher, teacher, educator. Mastering modern technologies of educational work. To improve the acquired knowledge in pedagogy and psychology, using them to solve the chosen problem.	5					✓	✓	✓	✓						
	Geography at School	PD	EC	Updated Content in Training	The purpose of the discipline: Formation of educational and cognitive competence of students on the basis of understanding and analysis of the features of the development of an educational program focused on a modern competence-based approach in the educational process. Contents: Structure, content, purpose of the updated educational program. The principle of a gradual increase in knowledge and skills in the learning process. The purpose of training, based on the level formation of students' learning skills. Methods of teaching geography within the framework of renewed education.	4					✓	✓		✓						
		PD	EC	Methods of Teaching in Ungraded School of Natural Disciplines	The purpose of the discipline: Filling the content of the education of students enrolled in the educational program geography in the natural sciences. Contents: Methods of teaching natural sciences. Research methods. Relationship of the discipline with other sciences. The sizes of macro and micro objects of						✓	✓		✓						

				the world, the history of the origin of the Earth. The surface of the Earth, the main layers of the geographical shell, natural conditions, distribution of natural objects, habitat, geographical maps and atlases. Degree grid and coordinates. Continents and parts of the world. The nature of the oceans. The number and density of the world population.														
		BD	EC	Organization of Scientific Research Work at School	The purpose of the discipline: organization and planning of research work at school, analysis and conclusion of research methods, results obtained, preparation of articles, practice of artistic presentation of reports. Content: the subject of the Organization of research work at school is the control and management of the cognitive activity of the student, a set of approaches, methods of creation, means of knowledge of the scientific conditions of work on the basis of a planned product. Adapting the learning process with experience and the use of information technologies in processing, transportation and accumulation of accumulated material and creating results allows you to implement an individual-oriented learning model.	4											✓	✓
		BD	EC	Methods and Funds in Geographic Researches	Purpose: study of various geographical methods and means and their application in sectoral and complex geographical research. Contents: Analysis of the main methods of geomorphological, soil, geobotanical, complex physical-geographical, geophysical, geochemical, landscape-ecological and applied physical-geographical research, organization and application of field physical-geographical research and tools in complex geographical stations, development of modern methods and tools performing physical and geographical research.												✓	✓
		BD	EC	Sacred Geography of Kazakhstan	Purpose: Determining the geography of the sacred places of Kazakhstan, the value of the natural landscape, archaeological and architectural cultural and historical monuments. Contents: Physical and geographical position of the geography of sacred places in Kazakhstan. Acquaintance with the essence of unique monuments of natural and cultural heritage, which will forever remain in the memory of the Kazakh people and serve as a symbol of	5											✓	✓

					national unity and rebirth; "sacred" mountains, caves, rivers, natural boundaries, ancient settlements, places of unusual natural phenomena.														
		BD	EC	Sacred Geography of Turkestan Region	<p>Purpose: formation of the features of the formation of sacred places, historical and cultural monuments of nature and their cognitive significance in the Turkestan region.</p> <p>Contents: Sacred objects, burial mounds, objects of religious worship, historical and cultural, natural, archaeological, architectural monuments, natural landscape objects, mausoleums, temples, holy places of the Turkestan region. Organization, planning and formation of the basic conditions for the creation of electronic maps, maps and educational tourist excursion routes to sacred places.</p>													✓	✓
		PD		Educational and Teaching Pedagogical Practice	<p>The purpose of educational (pedagogical) practice is to educate students in a respectful attitude and constant interest in the teaching profession, the development of pedagogical activity, a communicative, research method. Improving general pedagogical and general psychological knowledge, skills for the formation and diagnosis of the student's personality and the state of the holistic pedagogical process of the school, class; creation of conditions for the creative organization of educational work. Formation of self-assessment of readiness for the implementation of a holistic pedagogical process. In the system of training the future profession of a teacher, the main role is played by educational (pedagogical) practice. It provides the theoretical and practical unity of teacher training, being a part of the university, inseparable from the integral pedagogical process.</p>	4						✓	✓	✓	✓

6. LEARNING STRATEGIES AND METHODS, MONITORING AND EVALUATION

Learning strategies	<p>Student-centered learning: The student is the center of teaching/learning and an active participant in the learning and decision-making process.</p> <p>Practice-oriented learning: focusing on the development of practical skills.</p>
Teaching methods	<p>Conducting lectures, seminars, various types of practices:</p> <ul style="list-style-type: none"> • application of innovative technologies; • problem-based learning; • case study; • work in a group and creative groups; • discussions and dialogues, intellectual games, olympiads, quizzes; • reflection methods, projects, benchmarking; • Bloom's taxonomies; • presentations; • rational and creative use of information sources: • multimedia training programs; • electronic textbooks; • digital resources. Организация самостоятельной работы студентов, индивидуальные консультации.
Monitoring and evaluation of the achievability of learning outcomes	<p>Current control on each topic of the discipline, control of knowledge in classroom and extracurricular classes (according to syllabus). Assessment forms:</p> <ul style="list-style-type: none"> • survey in the classroom; • testing on the topics of the discipline; • control works; • protection of independent work; • discussions; • trainings; • colloquiums; • essays, etc. <p>Boundary control at least twice during one academic period within the framework of one academic discipline.</p> <p>Intermediate certification is carried out in accordance with the working curriculum, academic calendar.</p> <p>Forms of conducting:</p> <ul style="list-style-type: none"> • exam in the form of testing; • oral examination; • written exam; • combined exam; • project protection; • protection of practice reports. <p>Final state certification.</p>

EDUCATIONAL AND RESOURCE SUPPORT OF THE EP

Educational Information Center	<p>The structure of the Educational Information Center includes 6 subscriptions, 16 reading rooms, 2 electronic resource centers (ERC). The basis of the network infrastructure of the Educational and Information Center is 180 computers with Internet access, 110 workstations, 6 interactive whiteboards, 2 video doubles, 1 video conferencing system, 3 A-4 format scanners, JIC software - AIBS "IRBIS-64" under MS Windows (basic set of 6 modules), stand-alone server for uninterrupted operation in the</p>
---------------------------------------	--

	<p>IRBIS system. The library fund is reflected in the electronic catalog available to users on the site http://lib.ukgu.kz on-line 24 hours 7 days a week. Thematic databases of their own generation: "Almamater", "Proceedings of SKSU scientists", "Electronic archive" have been created. Online access from any device via the external link http://articles.ukgu.kz/ru/ppp. Catalogs are processed electronically. EC consists of 9 databases: "Books", "Articles", "Periodicals", "Proceedings of the teaching staff of SKSU", "Rare Books", "Electronic Fund", "SKGU in Print", "Readers" and "SKU". The EIC provides its users with 3 options for accessing its own electronic information resources: from the "Electronic Catalog" terminals in the catalog hall and in the EIC subdivisions; through the information network of the university for faculties and departments; remotely on the library website http://lib.ukgu.kz/. Open access to international and republican resources: "SpringerLink", "Polpred", "Web of Science", "EBSCO", "Epigraph", to electronic versions of scientific journals in the public domain, "Zan", "RMEB", "Adebiet", Digital library "Aknurpress", "Smart-kitar", "Kitar.kz", etc. For people with special needs and disabilities, the library website has been adapted to the work of visually impaired users</p>
<p>Material and technical base</p>	<p>Specialized classroom with an interactive whiteboard - 106, 204. Classrooms - 205, 203, 301, 303 (building No. 7, Baitursynov St.). Republican state institution "Sairam - Ugam State National Natural Park" of the Committee for Forestry and Wildlife of the Ministry of Ecology, Geology and Natural Resources of the Republic of Kazakhstan. Branch on the right of economic management "Kazgidromet" of the Ministry of Ecology, Geology and Natural Resources of the Republic of Kazakhstan in the Turkestan region. School-gymnasium No. 26 named after Zhambyl. IT school-lyceum №7 named after K. Syptayev.</p>
