SOFT SKILLS. Behavior	al skills and personality traits
SS1. Competence in	SS 1.1. The ability to self-learn, self-develop and constantly update their
managing one's own	knowledge within the chosen trajectory and in an interdisciplinary
literacy	environment.
	SS 1.2. The ability to express thoughts, feelings, facts and opinions in the
	professional field.
	*
	SS 1.3. The ability for mobility in the modern world and critical thinking.
SS 2. Language	SS 2.1. The ability to build communication programs in the state, Russian
competence	and foreign languages.
	SS 2.2. The ability for interpersonal social and professional
	communication in the conditions of intercultural communication.
SS 3. Mathematical and	SS 3.1. The ability and willingness to apply the educational potential,
Science Competence	experience and personal qualities acquired during the study of
	mathematical, natural science, technical disciplines at the university to
	solve professional problems.
SS 4. Digital	SS 4.1. The ability to demonstrate and develop information literacy
competence,	through the mastery and use of modern information and communication
technological literacy	technologies in all areas of their lives and professional activities.
	SS 4.2. The ability to use various types of information and
	communication technologies: Internet resources, cloud and mobile
	-
	services for searching, storing, protecting and disseminating information.
SS 5. Personal, social and academic	SS 5.1.The ability for physical self-improvement and focus on a healthy
competencies	life to ensure a full-fledged social and professional activity through the
competencies	methods and means of physical culture.
	SS 5.2.The ability for socio-cultural development based on the
	manifestation of citizenship and morality.
	SS 5.3 The ability to build a personal educational trajectory throughout
	life for self-development, career growth and professional success.
	SS 5.4. The ability to successfully interact in a variety of socio-cultural
	contexts at study, at work, at home and at leisure.
SS 6. Entrepreneurial	SS 6.1. The ability to be creative and entrepreneurial in a variety of
competence	environments.
	SS 6.2. The ability to work in a mode of uncertainty and quickly
	changing task conditions, make decisions, allocate resources and manage
	time.
	GC 6.3. The ability to work with consumer requests.
SS 7. Cultural awareness	SS 7.1. The ability to show worldview, civil and moral positions.
and ability to express	SS 7.2. The ability to be tolerant of the traditions and culture of other
yourself	peoples of the world, to have high spiritual qualities.
HARDSKILLS	
Theoretical knowledge	HS 1. The ability to demonstrate knowledge of the main provisions and
and practical skills	concepts in the field of theory of foreign language education, linguistics
specific to this field	and translation studies, theory of teaching methods of foreign languages,
	communication, linguistic analysis and interpretation of the text, the
	current state and prospects of development of foreign language education,

3. Competencies of a graduate of the EP

linguistics and translation studies.
HS 2. Ability to conduct training sessions and extracurricular work on the
methodology of teaching foreign languages, linguistics and translation
studies at higher educational institutions and educational institutions of
secondary vocational education.
HS 3. The ability to apply research methods in professional activities,
analyze research materials in the field of foreign language education,
linguistics, intercultural communication and translation studies in
compliance with the bibliographic culture for solving professional
problems.
HS 4. The ability to organize an independent professional labor process,
has the skills of working in professional teams, to be able to provide the
work of these teams with appropriate materials for all the above types of
professional activities.
HS 5. The ability to evaluate the quality and content of information, to
highlight the most significant facts and concepts, to give them their own
assessment and interpretation with materials from various sources, as well
as to abstract and annotate written texts, compose analytical reviews on
given topics, find, collect and initially generalize factual material making
informed conclusions that allow the formation of innovative and digital
competencies of graduates.
HS 6. The ability to carry out linguistic analysis of texts through
analytical reading, annotation and abstracting of documents, scientific
works on teaching methods of foreign language education, linguistics and
translation studies and works of art in foreign languages, contributing to
the accurate perception of the original statement, predicting the likely
cognitive dissonance and inconsistencies in the process of translation and
their methods overcoming; orientation in the scientific linguistic
paradigm.
 HS 7. The ability to master the skills of using the methods and strategies
of teaching according to the updated curriculum (effective teaching,
formative and summative assessment, differentiated approach to teaching,
reflection), annotating and abstracting documents, scientific works on
teaching methods of teaching foreign language education, linguistics and
translation studies and works of art in foreign languages; translation of
various types of texts (mainly scientific and journalistic, as well as
documents) from foreign languages and into foreign languages HS8.The ability to demonstrate professional values: professionalism,
innovation, creativity, meritocracy, integrity.

3.1. Matrix of correlation of the learning outcomes of the educational program as a whole with the competences formed

					Content: Computer technologies in					
					translation studies; Introduction to the					

				problems of computer translation; Modern linguistic information technologies in the context of their use in translation studies and education; Informational resources; Multimedia technologies in education; Electronic encyclopedias, dictionaries.					
21	PD	EC	Types and lexical- semantic modification of translation	Aim: to form the skills of applying the methods of translation of lexical units of the original by using units of the target language in translation, the meanings of which do not coincide with the values of the original units Contents: Lexico-semantic modifications. Semantic structure of words in different languages. Lexico- semantic system of the language.				v	
22	PD	EC	Computer Linguistics	Aim: To develop skills in integrating modern linguistics and digital technologies in scientific research. Content: The course covers the paradigms of applied linguistics focused on the use of mathematical methods (algorithms, models) and computer tools (software, digital databases). The application of AI to improve the quality of NLP: predicting the next word, named entity recognition, handling ambiguity. The use of language models for text generation, translation, and analysis. Classification and text analysis using	5			v	

				AI. The application of AI methods for sentiment and emotional tone analysis. Automatic error correction in text using AI. The use of AI and computational linguistics in real- world applications.					
23	PD	EC	Translation of scientific and technical articles	Aim: to analyse different textual elements and translate scientific and technical literature correctly, and develop practical skills in achieving adequacy when translating special and technical texts. Content: Provides concepts of a scientific style, which is characterized by the logic of constructing sentences, semantic accuracy, informative richness, objectivity in presenting materials and hidden emotionality. Forms skills and analysis of translation of terminological vocabulary and complex grammatical structures, translation of scientific text using standardized language design.				v	
24	PD	EC	Medialinguisti cs in the aspect of translation	X X X	5	v			V

					features of the functioning of modern media, mass media genres and their linguistic characteristics; allows to develop the skills of translation, summarizing, annotating, interpreting and creatively commenting media texts, as well as analyzing articles as the main genre of mass media discourse with a comparative analysis of the language styles of modern English-language publications.						
25		PD	EC	Linguoconflict ology	Aim: to teach how to act effectively in conflict situations, and to teach means and methods of resolving conflicts related to professional activities Content: Language (speech) conflicts, conflicts over language and conflicts with language use are studied. Forms the skills of recognizing a speech conflict: the confrontation of two or more communicants connected in a single communicative event, conditioned by different factors: mental, social and ethical, etc., which are extrapolated in the speech tissue of the dialogue.						V
26	Final attestation module		SRWM S	Research work of a master's student, including an internship and a master's	Aim: knowledge of the theoretical foundations of linguistics and translation studies, requirements for the implementation of the dissertation work; ways of presenting research results. Content: Ability to plan, collect and	24				v	v

	thesis	analyze data. Ability to work with the received material, analyze and screen out the material obtained during practice and scientific internship. Formulate research methods and draw conclusions in accordance with the goals and objectives of practice.					
27	Compiling and defence of master thesis work	Aim: application of the theoretical foundations of linguistics and translation studies; demonstrate theoretical knowledge and practical ability to substantiate the relevance, theoretical and practical significance of the topic of the dissertation work. Content: Collection and analysis of material, its relevance and adequacy. Managing the process of performing dissertations and achieving goals, results and conclusions. Presentation style (academic writing). Compliance with the instructions for writing dissertations.	8			V	V

5. Summary table reflecting the volume of credits mastered by modules of the educational program

6. Strategies, teaching methods and artificial intelligence, monitoring and assessment

Learning strategies	Student-centered learning: The student is the center of
Learning strategies	teaching/learning and an active participant in the learning and
	decision-making process.
	61
	Practice-oriented training: orientation to the development of practical
The shine such she	skills.
Teaching methods	Conducting lectures, seminars, various types of practices with:
	• the use of innovative technologies:
	• problem-based learning;
	• case study;
	• work in a group and creative groups;
	• discussions and dialogues, intellectual games, olympiads, quizzes;
	 reflection methods, projects, benchmarking;
	Bloom's taxonomies;
	• presentations;
	• * rational and creative use of information sources:
	• * multimedia training programs;
	• * electronic textbooks;
	• * digital resources.
	• * machine learning methods
	Organization of independent work of students, individual
	consultations.
Monitoring and	Current control on each topic of the discipline, control of knowledge
evaluation of the	in classroom and extracurricular classes (according to syllabus).
achievability of	Assessment forms:
learning outcomes	• survey in the classroom;
	• testing on the topics of the academic discipline;
	• control works;
	• protection of independent creative works;
	• discussions;
	• trainings;
	• colloquiums;
	• essays, etc.
	Boundary control at least twice during one academic period within
	the framework of one academic discipline.
	Intermediate certification is carried out in accordance with the
	working curriculum, academic calendar.
	Forms of conducting:
	• exam in the form of testing;
	• oral examination;
	• written exam;
	• combined exam;
	• project defense;
	• protection of practice reports.
	Final state certification.

as per the educational program Foreign language: two foreign languages

Director of DAA 2 Naukenova A.S. Director of DASc Mazarbek U.B. Director of DE&C Bazhirov T.S.

Appendix No. 1

for the educational program "Digital Linguistics and Intercultural Communication" developed by M.Auezov South Kazakhstan University, Shymkent

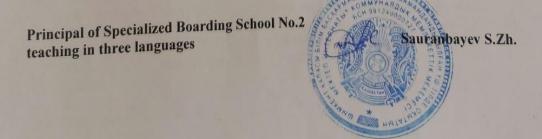

The educational program takes into account the modern requirements of the labor market and will prepare highly qualified teachers, linguists-translators with deep knowledge and skills to build a successful career in higher educational institutions and secondary schools, in research institutes and training centers, in domestic and international companies.

The uniqueness of the educational program "Digital Linguistics and Intercultural Communication" is focused on expanding the opportunities for training specialists based on educational technologies, new forms of integrating the educational process with scientific and innovative activities, focusing education on the application of fundamental and applied research results in socially significant areas of the digital economy and society. The solution to this problem is aimed at further deepening the interdisciplinary approach, developing undergraduates' creative ability to solve systemic problems in the current areas of teaching methodology and linguistics, translation theory in the areas of professional activity in order to form innovative and digital competence among graduates.

The reviewed program includes: general characteristics; characteristics of the graduate's professional activity; key and professional competencies of a master graduate's educational program, formed as a result of acquiring the master's program M057 Linguistics, focus (profile) 7M023 Languages and literature; documents regulating the content and organization of the educational process in the implementation of the educational program; funds of assessment tools for conducting intermediate and state final certification and other regulatory and methodological documents and materials that ensure the quality of training of master students.

The educational program regulates the goals, expected results, content, conditions and technologies for the implementation of the educational process, assessment of the quality of graduate training in this area. The structure of the educational program contains components aimed at developing practical skills and professional competencies. The components of the modular educational program are professionally oriented. The description of the disciplines very clearly informs about the content and learning outcomes.

In a market economy, one of the priority areas of education is the training of competitive personnel based on the continuous development of the intellectual and spiritual potential of the individual. The field of foreign language education is no exception, in this regard, the educational program "Digital Linguistics and Intercultural Communication" for undergraduates is necessary, and its content is relevant.

Appendix No. 2

Expert opinion

for the educational program Digital Linguistics and Intercultural Communication

The current situation in the Kazakhstani market of educational services is characterized by increased competition. At the same time, the key factor in the competitiveness of educational organizations is the quality of the educational services provided, which is established using various quality assessment mechanisms. One of the priority areas is the training of competitively capable personnel based on the continuous development of the intellectual and spiritual potential of the individual. The field of foreign language education, linguistics and translation studies is no exception, in this regard, the educational program "Digital Linguistics and Intercultural Communication" is necessary, and its content is relevant.

The goal of the educational program is consistent with the mission of the university and is aimed at generating new competencies, training a leader who transfers research and entrepreneurial thinking and culture.

The educational program is harmonized with the 7th level of the National Qualifications Framework of the Republic of Kazakhstan, with Dublin descriptors, 1stcycle of the Framework for Qualification of the European Higher Education Area, also with the 7thlevel of the European Qualification Framework for Lifelong Learning.

The educational program is focused on a professional and social order through the formation of professional competencies related to the necessary types of research, practical, managerial and entrepreneurial activities, adjusted to meet the requirements of stakeholders.

The educational program consists of 6 modules: the Module of Scientific and Pedagogical Training, Methodological Foundations of Teaching, Methodology of Foreign Language Teaching and Intercultural Communication, Linguistic Modifications and Digital Applications in Translation, Communication Situations and Industry Translation Strategies, Final Certification Module. The total number of credits is 120.

A graduate of this educational program is awarded the degree of "Master of Arts in the educational program Digital Linguistics and Intercultural Communication".
