

Diploma Supplement Master

I. DIPLOMA SUPPLEMENT

1. INFORMATION IDENTIFYING A HOLDER OF THE QUALIFICATION

1.1. Surname

1.2. First name

1.3. Date of birth

1.4 Student ID number or code(if any)

2. INFORMATION IDENTIFYING THE QUALIFICATION

2.1. Qualification title (if relevant) (title (mother tongue)

2.2 Main direction of training for qualification

Master of Science in the educational program
7M05123-"Biotechnology" (jaratylystanu
gylymdary magistr))

Biotechnology

2.3 Name and status of graduating institution (mother tongue)

M. Auezov South Kazakhstan University (M. Áýezov atyndagy
Oñtústik Qazaqstan ýniversiteti) is a university which has
undergone external quality assurance by agency IQAA, that is
certified to follow the European Standards and Guidelines [through
registration in EQAR and membership in ENQA] in Kazakhstan
with satisfactory results

2.4 Name and status of institution (if differ from p.2.3), managing
the research (mother tongue)

2.5 Languages of training / exam

See 2.3 above

Kazakh, Russian, English

3 INFORMATION ABOUT THE LEVEL AND DURATION OF THE QUALIFICATION

3.1. Qualification level

3.2. Official duration of the program in credits
and years

-Level 7 of NQF(see p.8),
-Second cycle QF-EHEA/Level 7 EQF

2 years /120 ECTS credits

3.3. Entrance Requirements

Bachelor degree

4. INFORMATION ABOUT THE PROGRAM AND LEARNING OUTCOMES

4.1. Form of study

Full-time

4.2. Learning outcomes of the program

- Apply the complex of acquired knowledge and skills in the management of biotechnological science. Analyze and apply modern technological methods to solve complex engineering problems in processing raw materials of plant and animal origin. Create intensive environmental cleaning technologies in the agro-industrial complex using various biotechnological methods.
- Conduct scientific research in the field of scientific and methodological work using modern and innovative (including digital) teaching technologies.
- Use research, entrepreneurial skills and skills of work in the face of uncertainty.

Effectively work individually and as a member of a team, correctly defend own point of view, correct own actions and use various methods, ably and effectively inform to any audience the meaning of own ideas and conclusions on problems in the field of biotechnology.

- Able to demonstrate knowledge of history and philosophy of natural and technical sciences, fundamental scientific and professional training, solve modern scientific and practical problems, plan and conduct research and experimental research activities;

- Create and improve bioobjects for biotechnological productions, independently combine methods of biotechnology for production of modern bioproducts.

- Apply new methodologies of psychological and pedagogical sciences, biotechnological studies of phenomena and processes, the concept of biotechnological education, giving an idea of the impact of pollution on the environment.

- To be able to competently design and implement energy-saving, low-waste, environmentally friendly technologies that ensure high quality of finished products, technological processes for processing raw materials of plant and animal origin.

4.3. Information on the program, obtained individual credits, grades / points

See transcript

4.4. Assessment system and a table of points distribution, if any

4.5. General classification of qualification (mother tongue)

Local alphabetic system grade	Local digital equivalent of a points	Percentage	Local traditional system grade	ECTS grade
A	4.0	95-100	Excellent	A
A-	3.67	90-94		
B+	3.33	85-89	Good	B
B	3.0	80-84	Good	C
B-	2.67	75-79		
C+	2.33	70-74		
C	2.0	65-69	Satisfactorily	D
C-	1.67	60-64		
D+	1.33	55-59		
D-	1.0	50-54	Satisfactorily	E
FX	0.5	25-49	Unsatisfactorily	F, FX
F	0	0-24		

5. INFORMATION ABOUT THE QUALIFICATION STATUS

5.1. Access to further education

Master degree entitles their holders to be admitted to doctoral study programs

5.2. Access to professional status (if relevant)

6. ADDITIONAL INFORMATION

6.1. Additional Information

The educational program was accredited by the European accreditation agency ASIIN in 2019. The accreditation is valid until 2026.

6.2. Other information sources

7. CERTIFICATION OF APPLICATION

7.1. Date

7.2. Signature

7.3. Status (Rector)

7.4. Official seal

8. INFORMATION ABOUT NATIONAL HIGHER EDUCATION SYSTEM

Secondary education in Kazakhstan

Secondary education in Kazakhstan is mandatory and includes general primary, basic secondary, general secondary, technical and vocational education. For the first grade 6-7 years old children are accepted. Secondary education in Kazakhstan has three stages: primary (1-4 grades), basic (5-9 grades) and senior (10-11 grades). There are educational programs are created that are implemented in special schools for the fullest development of the potential opportunities of gifted children. Technical and vocational education is provided for 3-4 years in colleges and schools on the basis of general education on a competitive basis.

Higher Education in Kazakhstan

Higher Education in Kazakhstan is acquired on the basis of secondary education. School-leavers pass final and entrance exams in the form of a unified national test (UNT) or complex testing (for school-leavers of previous years) for admission to the university. After graduating HEI graduate receives a bachelor's or specialist degree. Second higher education in Kazakhstan is conducted only on a fee basis with accelerated training period of training.

Postgraduate education in Kazakhstan

To receive a postgraduate education in Kazakhstan it is necessary a bachelor's or master's degree. Training of scientific personnel is conducted in master and PhD doctoral education of universities. Kazakh citizens on a competitive basis have the right to be awarded the international "Bolashak" scholarship to study abroad. The duration in master education is 1-2 years, in PhD doctoral - 3 years.

In the Republic of Kazakhstan higher education institutions may be public and private. Nazarbayev University is recognized as the autonomous institution of education.

Degrees and qualifications

Degrees and qualifications in higher education and post-graduate education are awarded in accordance with the level of National framework of qualifications of the Republic of Kazakhstan, which is comparable to the European framework of qualifications.

Quality Assurance System

In Kazakhstan, all universities, regardless of their form of ownership, type and status undergo state control that is implemented in the form of: 1) state certification of educational institutions; 2) monitoring of the compliance with the legislation of the Republic of Kazakhstan on education and qualification requirements for educational activities.

1. State certification is a procedure performed by education authorities once every 5 years in order to monitor observance of the educational services provided by educational organizations, requirements of State and compulsory standards of education (SCSE). SCSE determines the range of general requirements for each level of education to the content of education, to the maximum amount of academic load of students, to the training level of trainees and the level of training and is mandatory for all educational institutions regardless of ownership, types and kinds.

2. Monitoring of educational institutions on observance of the legislation of the Republic of Kazakhstan on education and licensing is conducted in the form of inspection and other forms.

In addition to the state control in Kazakhstan functions the system of natural recognition of the quality of education, which operates in the form of independent accreditation of universities and (or) educational programs implemented by them. Accreditation of educational institutions present itself a recognition procedure by accrediting body a compliance of educational services with established standards (regulations) of accreditation with the purpose of providing the publicity of objective information about their quality and confirming the presence of effective mechanisms for its increase. Educational institutions are eligible to voluntarily undergo the national and international institutional, specialized accreditation in accreditation bodies entered in the register of the authorized body in the sphere of education. Educational institutions that have passed institutional and specialized accreditation procedures are exempt from state certification by the accredited educational programs (specialties) for a period of accreditation, but not more than 5 years.

Credit system

Since 2004, the credit technology of training are introduced into all higher education institutions of the republic that involves the training on the basis of self-selection and planning of study subjects sequence by students using credit as a unified unit of training volume measure of the learner and the teacher.

In 2018 Kazakhstan adopted new academic credits. A workload of one Kazakh academic credit (30 academic hours) corresponds to 1 ECTS-credit (25-30 academic hours).

Education system of the Republic of Kazakhstan

The system of higher and postgraduate education of the Republic of Kazakhstan
